Online Networked Lighting Controls Training Course

What are the benefits of taking the online NLC training?

- It's all online! You can take the course when and where it's convenient.

- You can complete the course at your own pace and use the course dashboard to keep track of your progress.

- The course has a simple-to-use design so you can navigate the modules with ease.

- Clear and concise narration allows you to retain content. Go back to any module to review the information.

What will you learn about NLCs?

- What has and hasn't worked with traditional lighting control approaches, and how manufacturers are improving products to make them more user-friendly and easier to install.

- The features and benefits of networked lighting controls, and the ability to identify system configurations that will maximize the benefit for any situation.

- What are good questions to ask as you work to understand a customer's needs and plan an installation?

- System requirements, cybersecurity, and emergency lighting considerations.

- How to use the DLC NLC Qualified Product List (QPL), an online resource that helps you select systems that match your clients' needs.

- Finally, test your learning with real-world design workshops.

The Online NLC Training Course is made up of 8 modules and takes about 4-6 hours to complete. Learn at your own pace!
