

Meeting Agenda

DLC Industry Advisory Committee Meeting Q3 2021

September 1, 2021

10:00am-3:00pm EDT

Royal Sonesta Hotel, Cambridge, MA

Program Updates:

- LUNA – provided updated timeline on Luna V1.0.
- NLC energy reporting working group –reported progress on Energy reporting Working Group.
- Reported QPL and website updates.
- Provided report out on stakeholder interviews with utilities, specifiers and manufacturers regarding interest in interactivity of QPLs.

Reviewing Opportunity with Horticultural Lighting and Controls

Discussion: Lessons from Hort for commercial lighting for different hort lighting applications and crop types.

Aligning Lighting with the Decarbonization Agenda

“Jamboard Activities” were used to engage the group in interactive discussion on the following topics:

- What will the decarbonization of the electric power sector mean for incentive programs?
- How can the lighting industry help cities meeting carbon reduction and EE goals for buildings?
- How do codes influence product design?
How do we get building owners to care about demand response and demand flexibility?
- Can lighting deliver on demand response and demand flexibility?
- Brainstorm on activities to drive milestone achievement in the decarbonization agenda.
Timeline-What needs to be in place?

Equity in Lighting and the Building Industry

Update on IES Diversity committee work.

The committee discussed ways the DLC and the IAC can contribute to Diversity, Equity, Inclusion and Respect (DEIR) goals.

Subcommittee Report outs

- Outdoor Lighting Strategy
- Utility Program Design
- Integrating NLCs in energy policy and programs (Levin)
- Smart Building/Smart Lighting

Next Steps for IAC

Next meeting is Wednesday, December 8th @ 1pm
