Specification sheets that are submitted must be the customer-facing specification sheets used in the marketplace. Specification sheets created for the sole purpose of DLC submission are not acceptable. Product specification sheets must clearly detail dimming/control capabilities if products are capable of dimming and/or have controls. Multiple specification sheets are acceptable if all products are not included in a single document.

## Terms of Use

**REPLACE WITH MFR NAME**, herein known as Applicant, has read and agrees to the Terms of Use, the terms and conditions, program policies, etc. set forth by the DesignLights Consortium® ("DLC"), a program of Efficiency Forward, Inc. ("EF"), detailed at [www.designlights.org](http://www.designlights.org), including application instructions for Solid State Lighting ("SSL") products, Horticultural Lighting products, and Networked Lighting Control systems, Technical Requirements for SSL products, Horticultural Lighting products and Networked Lighting Control systems, Logo Use Guidelines, and Surveillance Testing Policy. By executing this statement, Applicant represents, warrants and certifies that all model numbers submitted for qualification by Applicant meet DLC minimum requirements for all applicable parameters and performance metrics for each product or system type as described in the Technical Requirements that pertain to the application. If this application includes multiple products (where allowable), Applicant additionally certifies that all variations are within allowable variations for the application type.

Applicant acknowledges and agrees that EF reserves the right to cease operating any of the Qualified Product Lists ("QPLs") or to alter or amend program policies, including Technical Requirements and QPL category definitions, fees and review timeframes at any time at its sole and exclusive discretion, and that such changes may result in the products/systems in this application being removed from the QPLs.

EF and its directors, officers, servants, employees, agents, representatives, and third-party contractors engaged by EF to assist with various aspects of the QPLs (together the "EF Parties") make efforts to ensure that application review is done consistently, fairly and accurately, but Applicant understands, acknowledges and agrees that errors or omissions may occur and that the EF Parties make no guaranty, and shall bear no liability, with respect to the determination as to whether a product meets the Technical Requirements for qualification, or with respect to the decision to include or exclude any particular product/system on the QPLs or to cease operating the QPLs.

In addition, Applicant understands and acknowledges that payment of application fees does not guarantee that its products/systems will be qualified, only that its application shall be reviewed as provided herein per program policies and guidelines. If EF determines in its sole and exclusive discretion that any product/system submitted fails to meet the required performance specifications or that Applicant has made any misrepresentation regarding the selected category or product/system performance in connection with the application process or the QPLs, then the entire application may be rejected or active products may be de-listed from the QPLs. Applicant further acknowledges and agrees that (i) any such determinations shall be made at EF's sole and exclusive discretion and (ii) while the EF Parties may furnish Applicant with feedback regarding a rejected application or product/system de-listing, the EF Parties are under no obligation to do so.

I agree to be bound by the above-listed Terms of Use.
